

1. What document provides the unifying structure for the integration of critical infrastructure protection efforts and resiliency strategies into a single national program?
 - a. The Homeland Security Response Plan
 - b. The Sector-Specific Protection Plan
 - c. The Critical Infrastructure Response Plan
 - d. The National Infrastructure Protection Plan
2. Complete the Statement: The responsibility for developing business continuity and emergency management plans to address the direct effects of incidents lies with:
 - a. Critical infrastructure owners and operators
 - b. The Federal Emergency Management Agency
 - c. The DHS Office of Infrastructure Protection
 - d. Sector Specific Agencies
3. Complete the Statement: Critical infrastructure protection plans should explicitly address the following topics, EXCEPT FOR.
 - a. Risk management
 - b. Partnership building and information sharing
 - c. Corrective actions
 - d. Roles and responsibilities
4. What is government's role when engaging owners and operators to form partnerships?
 - a. Working with owners and operators to enforce compliance with widely-held protective measures and practices
 - b. Encouraging and providing incentives to owners and operators to take action to protect critical infrastructure
 - c. Creating partnerships that rely on civic engagement for critical infrastructure protection
 - d. Developing relationships with government regulatory partners that include mechanisms for sharing mandatory data
5. The following statements are applicable to establishing partnership goals, EXCEPT FOR
 - a. Goals should duplicate those met under existing emergency operations programs.
 - b. Goals should help partners to identify specific risk-reduction strategies that will most significantly enhance protection.
 - c. Goals should help partners maintain a common vision of desired protection and resilience criteria.
 - d. Goals should reflect the broad protection and recovery goals of the full range of partners.

6. Which of the following is a benefit of infrastructure protection partnerships for owners and operators?
 - a. Information provided by partners can satisfy regulatory reporting requirements.
 - b. Partners automatically receive access to sensitive and classified threat information.
 - c. Partners are eligible for subsidies under the National Infrastructure Protection Act.
 - d. Partners receive timely and useful information about threats to critical infrastructure.
7. Owner/operator concerns about sharing sensitive or proprietary information can be moderated by the following, EXCEPT FOR:
 - a. Leveraging existing public-private partnerships
 - b. Developing and establishing agreements in advance about the use of shared information
 - c. Identifying classified information networks to protect proprietary information
 - d. Building confidence and trust over time
8. Complete the Statement: One of the key benefits of Protected Critical Infrastructure Information (PCII) is that it:
 - a. Cannot be used for regulatory purposes
 - b. Makes classified threat information available to owners and operators
 - c. Permits discovery under Federal, State, and local disclosure laws
 - d. Includes threat awareness materials tailored to a particular sector's needs
9. What step is needed after information is collected?
 - a. Determine information resources
 - b. Validate information
 - c. Establish information analysis centers
 - d. Form public-private partnerships
10. Complete the Statement: Protection partners focus their information collection efforts and lay the foundation for a common operating picture by:
 - a. Implementing the Critical Information Protection program
 - b. Identifying information needs up front
 - c. Participating in industry partnerships
 - d. Registering in warning and alert programs

11. What are the two factors used to evaluate reported information?
- The currency of the information and the evaluation of the source
 - The relevance of the information to terrorism or to other threats
 - The reliability of the information and whether it is actionable
 - The reliability of the source and the validity of the information
12. Complete the Statement: Risk management identifies how threats will be deterred:
- Vulnerabilities mitigated, and consequences exploited
 - Vulnerabilities eliminated, and consequences exploited
 - Vulnerabilities mitigated, and consequences minimized
 - Vulnerabilities eliminated, and consequences minimized
13. Complete the Statement: Critical infrastructure threat assessments should evaluate the following threats, EXCEPT FOR:
- Domestic terrorist attacks
 - Qualified workforce shortages
 - Drought
 - Cyber/database failures
14. Which of the following threats should we prioritize the highest when managing risk?
- Threats that are limited to publicly-owned infrastructure
 - Threats with the greatest consequences should they occur
 - Threats with the lowest probability of occurring
 - Threats that are confined to residential neighborhoods
15. Which of the following provides a set of tools for owners and operators to assess critical infrastructure asset vulnerabilities?
- The Automated Critical Asset Management System
 - The National Terrorism Advisory System
 - The Homeland Security Exercise and Evaluation Program
 - The Critical Infrastructure Resource Center
16. The following are examples of protective measures, EXCEPT FOR:
- Building system redundancies
 - Automating inventory functions
 - Installing security systems
 - Hardening facilities

17. Complete the Statement: The most effective protective programs have the following characteristics, EXCEPT FOR:
- a. Cost-effective
 - b. Coordinated
 - c. Risk-informed
 - d. Delegated
18. Complete the Statement: Continuous improvement activities provide the following benefits, EXCEPT FOR:
- a. They help to identify best practices from other industries.
 - b. They help to identify gaps in policies, plans, and procedures
 - c. They better prepare personnel to protect against potential threats.
 - d. They enable participants to apply policies, plans, and procedures in a safe environment.
19. Complete the Statement: Exercises conducted with major stakeholders strengthen protection capabilities by helping to:
- a. Exploit vulnerabilities and weaknesses in protective measures
 - b. Provide outreach and training resources to major stakeholders
 - c. Improve communications and promote consistency
 - d. Identify best practices through benchmarking
20. Complete the Statement: Implementation plans provide the following benefits, EXCEPT FOR:
- a. They identify areas for improvement.
 - b. They provide a schedule for the completion of actions.
 - c. They identify specific actions that must be taken.
 - d. They identify expected outcomes from corrective actions.
